

Giada Maria Campolongo

FULL-STACK DEVELOPER

PROFILE

Junior developer with focus on Python and JavaScript. Self-taught, with the ability to ship projects to production. Looking for a role where I can grow across backend, frontend and data, without being limited to a single stack.

SKILLS

LANGUAGES

Python · JavaScript · TypeScript · HTML5 · CSS3 · SQL (basics)

BACKEND & DATA

Flask · pandas · scikit-learn · REST API · Google Sheets API · pdfplumber

FRONTEND

React 18 · Vite · Tailwind · Jinja2 · Leaflet · i18next

TOOLS & DEVOPS

Git · Docker · Linux · Cloudflare · Netlify · Advanced Excel

LANGUAGES

Italian — Native

English — B2 · Upper Intermediate

EDUCATION

Web Design Course
Dante Alighieri Vocational Training Agency, Naples
2024 – 2026

High School Diploma
Liceo Elsa Morante, Naples — Economic-Social specialization
2019 – 2024 · Final mark 100/100

WORK EXPERIENCE

Data Annotator — 2026

Outlier — Remote

- Annotation and review of multimodal data (text, code, mathematical and logical reasoning) for generative AI training.
- Quality evaluation of AI outputs against structured criteria: accuracy, coherence, safety, helpfulness.
- Application of complex, evolving technical guidelines to ensure dataset consistency.

Office Assistant — November 2025 – present

Algeco Power

- Full management of business e-mail, scheduling and document flow; coordination with the field technical team.
- Administrative handling of returns, material reintegrations and related documentation (e.g. transfer orders).
- Independent development of the in-house management system (see Projects) to automate the processes I handled manually.
- Advanced Excel (formulas, structured sheets), company CRM, priority management in a fast-paced operational environment.

Sales Back-Office — Jun 2025 – Oct 2025

Selekta

- Outbound calls and customer telephone support in a high-volume sales environment.
- Contract finalization, deal follow-up, internal reporting via CRM.

PROJECTS

Internal management system for technician route optimization

Algeco Power

- Full-stack web system developed independently for the operational management of Enel electricity meter replacements.
- Modular Python/Flask backend (~20 modules), bidirectional sync with Google Sheets, PDF parsing of work orders; user authentication, caching and automatic backups.
- DBSCAN geographic clustering for zoning, daily route optimization via OSRM in a Docker container, interactive Leaflet map.
- Deployed on a VPS Ubuntu with remote access via Cloudflare Tunnel; automatic generation of WhatsApp messages for customers.

`STACK` Python · Flask · pandas · scikit-learn · pdfplumber · gspread · Leaflet · Docker · Linux · Cloudflare

Portfolio website for a music artist — micromihai.com

- Single-page application with advanced routing, multi-language support (i18next), progressive animations and SEO optimization.
- Serverless backend via Netlify Functions with validated form and Telegram notifications for every new contact.

`STACK` React 18 · TypeScript · Vite · i18next · Netlify Functions

Personal portfolio — giada-maria-campolongo.netlify.app

- Personal website with fully custom UI, responsive layout, modular architecture and 3D parallax effect.

`STACK` React 18 · TypeScript · Vite · Tailwind CSS

Company website prototype — algecopower.netlify.app

- Modern restyling of the company website: glassmorphism design, responsive layout, smooth animations and validated form.

`STACK` React 18 · TypeScript · Vite
